

INDUSTRY

WE UNDERSTAND YOUR NEED FOR:

- Prototype, module design, NPI, system integration and testing
- Global manufacturing facilities
- Value analysis & engineering
- Warehousing, logistics and spare parts maintenance

SHORTER TIME TO MARKET

PartnerTech has a long history of success in the industrial market.

We understand the rigorous requirements for technological expertise, product functionality and short time to market. With a global network of manufacturing facilities across Europe, China and the United States and state-of-the-art facilities, PartnerTech can support you through your product's entire life cycle.

By partnering with you during product development, we can safely and efficiently bring your product from prototype through production and distribution.

CURRENT OFFERINGS

- Development projects, including design, prototypes and industrialization
- Product manufacturing, including assembly and testing of mechanical components and complete systems
- Management of both newly launched and mature products
- After sales services, logistics and product repair

ACCREDITATIONS AND STANDARDS

- ISO9001:2000
- ISO14001:2004

MANUFACTURED PRODUCTS

Power and range control units, system for remote reading of electric meters, control mechanics for automatic door openers, industrial grade cleaning equipment, forklifts and industrial robots.
